WEITBLICK

WEITBLICK MATERIALITY ASSESSMENT

WEITBLICK MATERIALITY ASSESSMENT

Between November 2025 and May 2026, we conducted our first Weitblick Materiality Assessment.

This was a simplified materiality assessment based on the principles of the Corporate Sustainability Reporting Directive (CSRD) and supported by the guidance documents and publications of the German Sustainability Code (DNK).

MATERIALITY ASSESSMENT

2026

The materiality assessment identifies and prioritizes topics:

- that are material to our company and value chain, and
- that are important to our relevant stakeholders (e.g., customers, employees, business partners, and society).

The assessment considers:

- financial perspectives (risks and opportunities)
- the impacts of our activities on the environment and society

Critical Impact

High Impact

Medium & Low Impact
